EXCELERATE MOBILE APP DEVELOPMENT INTERNSHIP • COHORT 0510

Week 2 Deliverable: Working UI Prototype Report

Project: **ED-TECH App (Team 6)** | Submission Date: **October 19, 2026** | Lead: **Irtaza Ahmad**

GitHub Repository:	https://github.com/irtazaad328/ED-TECH_App
Figma Wireframes:	https://www.figma.com/design/QWMnhOtY99AqOI90lf4yMk/Team-6-Wireframes
Project Scope:	13 Complete Interactive Screens (Learner Journey & Teacher Management)
Technology Stack:	Flutter 3.47.4 • Dart 3.13.3 • Material Design 3

1. Executive Summary & Week 2 Objective Alignment

For Week 2, the core objective was translating low-fidelity Figma wireframes into an interactive, functional Flutter UI prototype. While Excelerate guidelines mandated at least **four core screens** (Login, Home, Program Listing, and Program Details), **Team 6 has built and deployed all 13 interactive screens** covering both Learner and Teacher operational flows. All 13 screens feature full navigation, responsive layouts, data models, state handling, and 100% passing automated tests.

2. Mandatory Deliverables: Core 4-Screen Flow Deep-Dive

Screen	Figma Mapping	Key Features & Interactivity Implemented
1. Login Screen login_screen.dart	Screen 2 (Learner) Screen 10 (Teacher)	• Multi-role support (Student / Teacher toggle) • Email regex validation & 6+ character password check • Password visibility eye toggle & interactive error toasts • Direct routing to Signup or Home/Dashboard upon login
2. Home Screen home_screen.dart	Screen 4 (Learner Home)	• Learner greeting banner & active notifications badge • Live Announcements card carousel • Ongoing course progress card with linear progress bar • Featured Programs explorer & bottom navigation bar
3. Programs Listing programs_list_screen.dart	Screen 5 (Course Explorer)	• Loads mock courses from assets/data/programs.json • Real-time search filter across titles, teachers, and topics • Category filter chips (Mobile Dev, AI, UI/UX, Cloud) • Bookmark toggle with instant snackbar notification
4. Program Details program_details_screen.dart	Screen 6 (Course Details)	• Dynamic arguments extraction via ModalRoute (title, teacher, price, rating) • Detailed course syllabus & 'What is Included' checklist • Interactive Bookmark and Share buttons • Sticky bottom checkout bar with 'Add to Cart' transition

3. Complete Team 6 Screen Implementation Matrix (All 13 Screens)

#	Screen Name	Implementation File	Owner	Status
1	Role Selection (Learner)	role_selection_screen.dart	Irtaza Ahmad	**100% Passed**
2	Learner Login	login_screen.dart	Fatima Zahid	**100% Passed**
3	Learner Signup	signup_screen.dart	Fatima Zahid	**100% Passed**
4	Learner Home Portal	home_screen.dart	Irtaza Ahmad	**100% Passed**
5	Programs List	programs_list_screen.dart	Idiris Hassan	**100% Passed**
6	Program Details	program_details_screen.dart	Sameer Rizwan	**100% Passed**
7	My Cart Screen	cart_screen.dart	Mannu	**100% Passed**

8	Payment & Checkout	payment_screen.dart	Akshata	**100% Passed**
9	Role Selection (Teacher)	role_selection_screen.dart	Irtaza Ahmad	**100% Passed**
10	Teacher Login	teacher_login_screen.dart	Aishika Pal	**100% Passed**
11	Teacher Signup	teacher_signup_screen.dart	Aishika Pal	**100% Passed**
12	Teacher Dashboard	teacher_dashboard_screen.dart	Jennifer Shantal	**100% Passed**
13	Cart Management	cart_management_screen.dart	Abdul Kadir	**100% Passed**

4. Navigation Architecture & Route Verification

The application relies on declarative named routes (AppRoutes) defined in lib/routes/app_routes.dart. Users begin at AppRoutes.welcome and navigate seamlessly through two designated application branches:

- **Learner Flow:** Welcome → Role Selection (Student) → Login / Signup → Home Portal → Programs List → Program Details → My Cart → Payment (Card / Bank / Mobile Wallet) → Confirmation Receipt → Home.
- **Teacher / Admin Flow:** Welcome → Role Selection (Teacher) → Teacher Login / Signup → Teacher Dashboard (Metrics & Quick Actions) → Cart Management (Pipeline Status Filter & Reminders).

5. Quality Assurance, Build & Git Verification

- **Automated Testing:** flutter test executed with **100% passing rate** across all widget test suites.
- **Static Analysis:** flutter analyze verified with **0 compile errors** and clean import references.
- **Cross-Platform Verification:** Production Web build (flutter build web) compiled successfully.
- **Version Control:** All member Pull Requests (#1, #2, #3, #6, #7) cleanly reviewed and merged into main with meaningful commit histories.

6. Demo Video Walkthrough Guide (2–3 Minutes)

To satisfy the recommended video deliverable, Team Lead Irtaza Ahmad structured the presentation into a 4-part walkthrough:

- **0:00 - 0:35:** Welcome screen & role selection demonstration (Learner vs Teacher).
- **0:35 - 1:15:** Learner authentication (validation & visibility toggle) followed by Home Portal tour.
- **1:15 - 2:00:** Programs List live search, category filtering, and Program Details argument reception.
- **2:00 - 2:45:** Cart checkout, multi-method payment receipt dialog, and Teacher Dashboard review.
